Focus 35C Detector  
DRYVIEW 5950 Laser Imager  
DRYVIEW 6950 Laser Imager

# Powerful. Flexible. Affordable.

## Upgrade to an Affordable DR Capture-to-Print Solution.

Stepping up to digital X-ray is a tremendous way to speed your workflow, increase productivity and support a higher standard of care. But if you're a smaller facility, the cost of upgrading can be a real barrier – but no longer.

Our exceptionally budget-friendly CARESTREAM Focus 35C Detector, bundled with either our CARESTREAM DRYVIEW 5950 Laser Imaging System or CARESTREAM DRYVIEW 6950 Laser Imaging System, will let you tap into the full power of DR – easily and affordably.

## Advantages At a Glance

- The Focus 35C Detector offers wireless, digital image capture at an economical price.
- The detector is powered by advanced Image Suite Software – designed especially for smaller facilities.
- The DRYVIEW 5950 and 6950 Laser Imagers provide flexible, high-quality laser film printing and a range of throughput speeds.
- The superb quality of DR and high-resolution laser printing support greater diagnostic confidence.

## The Right Digital Solution for Your Facility.

The Focus 35C Detector, bundled with either our DRYVIEW 5950 or DRYVIEW 6950 Laser Imager, will give you a complete, fully digital capture-to-print solution. It's simple, flexible and affordable.

### The Focus 35C Detector

The CARESTREAM Focus 35C Detector with Image Suite Software offers you all these advantages:

- Ability to use your existing X-ray equipment
- Wireless design speeds workflow
- Beam Detect Mode eliminates cable connection to the generator and begins image capture automatically when the detector senses the X-ray exposure.
- Windows 10 Platform provides added CyberSecurity.
- An optional Mini-PACS module provides a broad tool set and image storage allowing the capability to share images, create reports and acquire images from other modalities.

### The DRYVIEW 5950 Laser Imager

The CARESTREAM DRYVIEW 5950 Laser Imager is designed specifically for low-to-medium volume environments. Benefits and key features include:

- High-resolution laser printing at 508 pixels per inch to support digital mammography applications
- Online access to two film sizes or film types
- Easy film size changes by simply exchanging film cartridges in normal lighting conditions
- Intuitive interface with easy operation to minimize user training

### The DRYVIEW 6950 Laser Imager

The CARESTREAM DRYVIEW 6950 Laser Imaging System is designed for fast throughput in the most demanding, high-volume film-printing environments. Benefits and key features include:

- High-resolution laser printing at 650 laser pixels per inch supporting digital mammography applications
- Online access to three film sizes or film types
- Easy film-size changes by simply exchanging film cartridges in normal lighting conditions
- Intuitive, multilingual touchscreen user interface
- Optional five-bin film sorter improves productivity

### Choose the Bundle that's Best for You.

Carestream offers a wide range of bundled capture-to-print systems, for either DR or CR imaging. You'll find the ideal combination to suit your needs based on budget, throughput, space and workflow. Contact your Carestream representative for details.
